PROFILE

Motivated B.Tech student specializing in Artificial Intelligence and Data Science with skills in Java, SQL, React.js, HTML, CSS, and Full Stack Development. Experienced in developing web applications, REST APIs, and AI-based projects, seeking a Java Full Stack Developer role to apply technical and problem-solving skills.

EDUCATION

Bachelor of Technology

Artificial Intelligence and Data Science

Nandha Engineering College (2022–2026)

CGPA: 7.8

HSC

Komarasamy Gounder Higher Secondary School (2021-2022) Grade – 74.3 %

SSLC

Komarasamy Gounder Higher Secondary School (2019-2020) Grade – 83.2 %

PROJECTS

IOT Based Smart Accident Alert System

Developed an IoT-based vehicle accident detection and alert system to improve road safety and emergency response time. Integrated vibration sensors, GPS, and GSM modules with a microcontroller to detect accidents automatically. Enabled real-time location alerts to emergency contacts and authorities for faster response during critical situations.

Technologies used:

- Arduino / ESP32 Microcontroller
- Vibration Sensor
- GPS Module
- GSM Module

TECHNICAL SKILLS

Languages

- Java,
- JavaScript
- SQL

Frontend

- HTML
- CSS
- React.js

Backend

- REST APIs

Database

- MySQL
- MongoDB

SOFT SKILLS

- Creativity & Innovation
- Problem-Solving
- Teamwork & Collaboration
- Adaptability

LANGUAGES

- English
- Tamil

CERTIFICATIONS

- Foundations of Data Science
- Cloud Computing
- Machine Learning Applications

Co-Curricular Activities

Participated in blood donation camps and promoted awareness among peers.

Took part in cleanliness drives and environmental campaigns

Participated in NSS special camps, developing teamwork, leadership, and organizational skills.

Smart Agri Ferti Advisor – Intelligent Fertilizer Recommendation and Farm Management System

Designed a full-stack agriculture management system that provides smart fertilizer recommendations based on soil, crop type, and environmental conditions. Built using React.js, Node.js, Express.js, and MongoDB for a secure and responsive web application. Helps farmers improve productivity through data-driven insights and efficient farm management.

Technologies Used:

- React.js
- Node.js
- Express.js
- MongoDB
- JavaScript

AI Driven Smart Monitoring System for Personal Protective Equipment

Developed an AI-powered workplace safety monitoring system using YOLO-NAS for real-time PPE detection with high accuracy. Implemented live video monitoring with a Stream lit interface to detect helmets and safety vests and improve industrial safety compliance.

Technologies Used:

- YOLO-NAS (Deep Learning Model)
- Python
- Streamlit
- OpenCV

INTERNSHIP

Nxtlogic Software Solutions – Front End Development Jan 2025

Designed responsive and interactive web apps utilizing HTML, CSS, JavaScript, and React, emphasizing good UI/UX design and cross-browser compatibility. Proficient in integrating RESTful APIs and enhancing the front-end for efficient and user-friendly web interfaces.

Tap Academy-Java Full Stack Development Jan 2026

Designed and implemented full stack web applications using Java, Spring Boot, HTML, CSS, JavaScript, and React to ensure efficiency between backend and frontend. Practical knowledge of REST APIs, SQL databases, and version control tools with expertise in developing responsive, intuitive, and optimized applications.
